

**State-Of-The-Art!**

**SPARKS  
SYSTEMS**

**NOW A POWERFUL, SOPHISTICATED  
AND RELIABLE RADIO SYSTEM.  
LET THE SRS-520 SOLVE YOUR  
METER READING PROBLEMS.**

## Benefits

- Reduced Labor
- Higher Accuracy
- Quicker Readings
- Greater Flexibility
- Reduced Hazards
- Improved Accessibility  
(no more basements  
or backyards)
- Reduced Cost

## Capabilities

Long Range Communication  
with GPS Capabilities

Capable of Connecting to Two  
Meters with Any Type of  
Register and in Any Combi-  
nation (Compound Meters,  
Water, Gas or Electric)

Multilingual – Software Allows  
Compatibility with Numer-  
ous Manufacturers' Meter  
and Billing Software

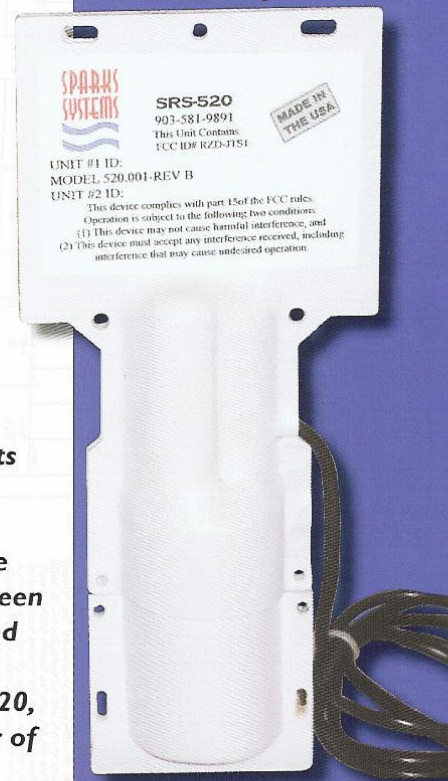

Capable of Multiple Reading  
Techniques from Hand-held,  
to drive-by, to More Cen-  
tralized Internet Access

Utilizes Multiple Channels to  
Sharply Reduce Interference  
from Other Radio Signals

- **Compact and easy to install with unlimited mounting options**
- **Fully potted and encased in rugged UV protected ABS housing welded shut for increased protection and waterproofing**
- **Field replaceable lithium battery with 10 year average life. Dual battery option for full time logging**
- **Charge pump system maintains constant transmit power levels over the life of the battery**
- **Programmable switch parameters handle all types of mechanical and electronic switches**

**Software features not offered with any other available unit.**

**The SRS-520 goes beyond any other product on the market.**

**The SRS-520 retrofits to most existing as well as new meters and does not require FCC licensing. Fourteen years of research and development have produced the SRS-520, making it the leader of the AMR field.**
